H-TX8C-RF

Radiofrequency remote control (RF)
with 4 dual function keys

Technical data

Power supply 2 x 1,5 V AA type battery
Frequency 868.3 MHz
Ingress protection IP IP20

Description

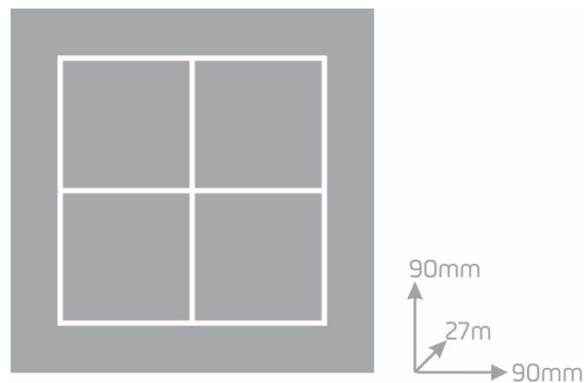

The H-TX8C-RF is a wireless, 4-key, dual-function radiofrequency transmitter. This remote control is suitable for controlling any output or group of outputs of an ONLY automation system. The 4 keys of this remote control have 2 functions each: one function for a short touch and another function for a long touch (key held more than 1 second).

Application

Command of lights, shutters and other outputs.

Features

RF Handheld Actuator with 4 dual function buttons
RF transmitter
Battery supply

Note:

Factory mode: All keys in mode 1 (Toggle).
If 1st level key (short touch) is reset to send the SCENARIO command, then the 2nd level key (long touch) is no longer available, and become the "confirmation scenario".

Subject to change without notice
