DIN Rail

ON/OFF actuator with 8 outputs 16 A with or without 4 binary inputs

## Technical data

Power supply Power consumption
$110 / 230 \mathrm{~V} \sim 50 / 60 \mathrm{~Hz}$ < 0.5W

Contact rating:
Resistive load
Incandescent Lamp
Inrush current
16A / 250VAC
3500W / 277VAC
LED (Electronic ballast)
165A / 20ms
Max. switching voltage 492A / 1.5ms

Max. switching current 480VAC Max. switching power

4000VA
Ingress protection IP IP20

Inputs
24VDC detection

## 1

Danger - Electric Shock Risk!
Switch off the power before any intervention.
Handling by qualified and authorized persons only.

## Description

The D-8OUT_ is an ON/OFF actuator to switch 8 independent loads up to 16 A .
The outputs are potential-free relay contacts grouped 2 by 2 . It is therefore possible to switch lines of different phases including low-voltage signals.
In case of predominantly inductive or capacitive loads a drastic reduction of switching capacity has to be considered in order to avoid premature damaging of the relay contacts.
In the module with 4 binary inputs, these can be used for the reading of push buttons, auxiliary contacts or detectors.

## Applications

Switching of lights, switches, contactors, irrigation systems or other switchable loads in homes, shops, hospitals, clinics and hotels.

## Installation

The D-8OUT_ is to be mounted in DIN Rail, occupying 5 modules of 17.5 mm .

## Available Modules

| Name | 4 Binary Inputs | 8 Outputs |
| :--- | :---: | :---: |
| D-80UT 16A | $\boldsymbol{V}$ |  |
| D-8OUT4IN | $\boldsymbol{V}$ | $\boldsymbol{\gamma}$ |

## Features

ON/OFF actuator with latching relay, 8 outputs
Model with 4 galvanically isolated binary inputs
Local operation even without BUS connection
Status indication by LED
Up to 20 buttons can be stored in the internal non-volatile memory.
Operation modes: Toggle, ON, OFF, Timer, Delay and Scenario, depending on the received command
